Black Pepper & Gruyère Biscuits

Serves 8

Plain dinner rolls again? Not this year! Step it up with these flaky biscuits, easily made from scratch in your own kitchen with black pepper, Gruyère cheese, buttermilk, and garlic-Parmesan butter.

Ingredients

- · Biscuit mix Contains: eggs, milk, soy, wheat
- · Black pepper
- · Gruyère cheese Contains: milk
- · Buttermilk Contains: milk
- · Garlic-Parmesan butter Contains: milk

Tools & Pantry

- · Baking sheet
- · Parchment paper or aluminum foil
- · Mixing bowl
- · Cooking spoon
- · Dry measuring cup (1/2 cup)
- · Cooking oil

Preheat the oven: 400°F conventional (for convection, use 375°F)

Prepare a baking sheet: Line with parchment paper or lightly greased aluminum foil

In a mixing bowl, combine the biscuit mix, Gruyère cheese, and half of the black pepper. For spicier biscuits, add more pepper as desired. Working quickly, break the garlic-Parmesan butter into small pieces and gently toss it with the biscuit mixture. Stir in the buttermilk just until the dough comes together. Do not overmix.

- 2 Lightly grease the bottom and sides of a ½-cup measuring cup. Scoop the dough into the cup until loosely filled almost to the top (do not pack it in), then turn out onto the prepared baking sheet. Repeat with the remaining dough, placing each scoop 2 inches apart. Set the baking sheet in the freezer for 10 min to chill. This will help the dough rise, resulting in flakier biscuits.
- Remove the baking sheet from the freezer and place into the oven for 12 min, or until the biscuits have risen and are lightly browned. Carefully remove from the oven and set aside until ready to serve.

Contains: Eggs, Milk, Soy, Wheat.
